education:

Pacific Union College: 4 years

Studied in: *Computer Science and Graphic Design*

past experience:

Developer/Designer at GTR Meetings & Events // Aug. 2010 - Present

Developer on a team that provides conference/meeting solutions for many clients. Ranging from a custom social network, to registration sites to mobile applications. My personal focus was on turning our projects into products, and creating a better brand.

Developed projects with PHP, MySQL, jQuery, HTML and CSS

Contract Lead Developer at Layer Dynamics Inc. // Mar. 2009 - Apr. 2010

RnD, as well as maintenance, on a platform that provides for a more effective way for publishers to integrate into more versatile online advertising, specifically in the video advertisement world.

Platform developed in PHP, MySQL, jQuery, HTML and CSS

Web/Art Director at 360 media // Jul. 2008 - Feb. 2009

Lead web developer as well as worked with the lead designer. Covered a vast array of projects where I was solely responsible for the piece. Used many different languages and skills as well as use of the Adobe Suite.

Developed projects with PHP, MySQL, Javascript, HTML, CSS and Flash

Lead Developer/Designer of recareas.com // Jan. 2007 - Feb. 2009

RnD for front-end/UI as well as back-end data management for a web start-up, driven on displaying recreational locations with information bundled as a Google maps mash-up.

Platform developed in PHP, MySQL, jQuery, HTML and CSS with extensive use of Google Maps API

Developer/Designer of fb.puc-sa.com // Sep. 2007 - Jun. 2009

A site that was a pre-yearbook for a college. I developed a full social networking site, with Image upload, comments, events, messages, friends, searching, etc. I was given limited time and resources, but managed to execute a site that many of the students loved. It reached over 2 million hits.

Site developed in PHP, MySQL, HTML and CSS

portfolio:

flowh.com // *May 2009 - Present*

Site developed in PHP, MySQL, jQuery, HTML and CSS also created its own API as well as embeddable widgets

echquo.com // *Apr. 2009*

Site developed in PHP, MySQL, jQuery, HTML and CSS with use of Twitter API as well as the PHP GD Library

pomosports.com // *Aug. 2006 - 2010 (previously weeklypickchallenge.com)*

Site developed in PHP, MySQL, jQuery, HTML and CSS

pomogames.com // *Jun. 2008*

Site developed in PHP, MySQL, HTML and CSS, and game developed in Flash

diogenlighting.com // *Nov. 2008*

Site developed in PHP, MySQL, jQuery, HTML, CSS and Flash, used sIFR for headings for custom type, and also built a custom CMS for the client
